

United States, NY

Syracuse Bio Campus

We were once in your shoes, now we're part of your extended team of experts.

Our Syracuse Bio Campus was previously an internal commercial manufacturing plant for a leading global biopharma. Many of our team members have stood where our clients stand today – managing timelines, navigating regulatory pressure, and making critical outsourcing decisions.

Modalities

Mammalian Cell-based Production

Bioconjugation

Service Offerings

- Process/Facility Fit & Gap Analysis
- Process Development & Optimization
- Process Characterization
- Analytical Tech Transfer
- Verification / Validation Run
- PPQ & Commercial
- CMC support

Regulatory Approvals

62+
As of Jan 2026

Proven Track Record

20 years of clinical and commercial biologics manufacturing

Antibody & Conjugation Under One roof

One of the largest antibody conjugation capabilities in the U.S.

No Fixed Boxes, Tailored Solutions

Engage with strategic and technical partners

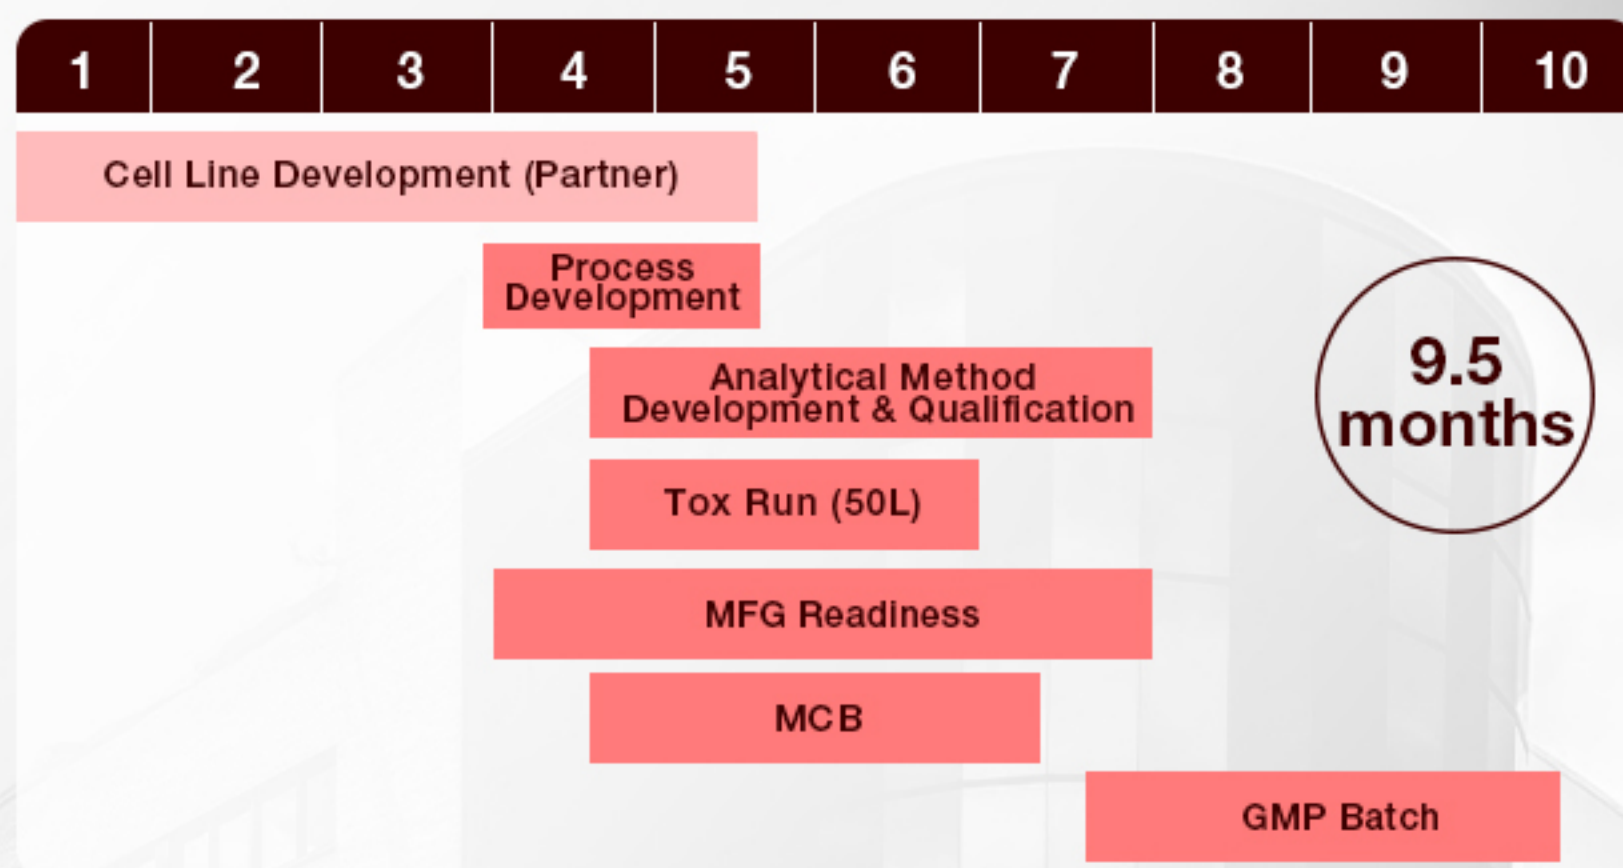

Every Process. Every Detail.

Built Around You and Delivered with Unmatched Quality

Early Phase Support

From Ideas to IND and Beyond

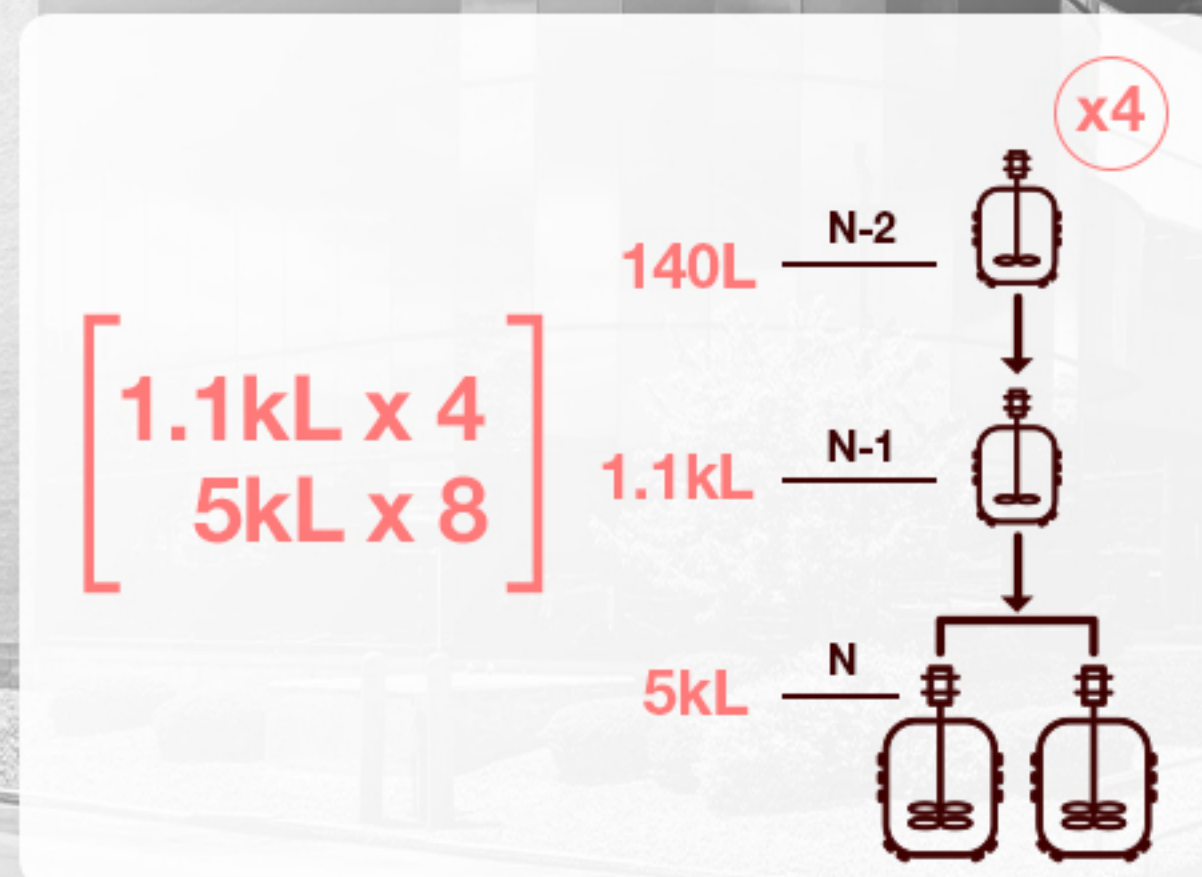

We deliver end-to-end support across the clinical development journey—from cell line development and process innovation to analytical validation and worldwide regulatory filings—all supported by our expert scalable manufacturing.

Commercial Manufacturing

Powering Commercial Biologics for Healthier World

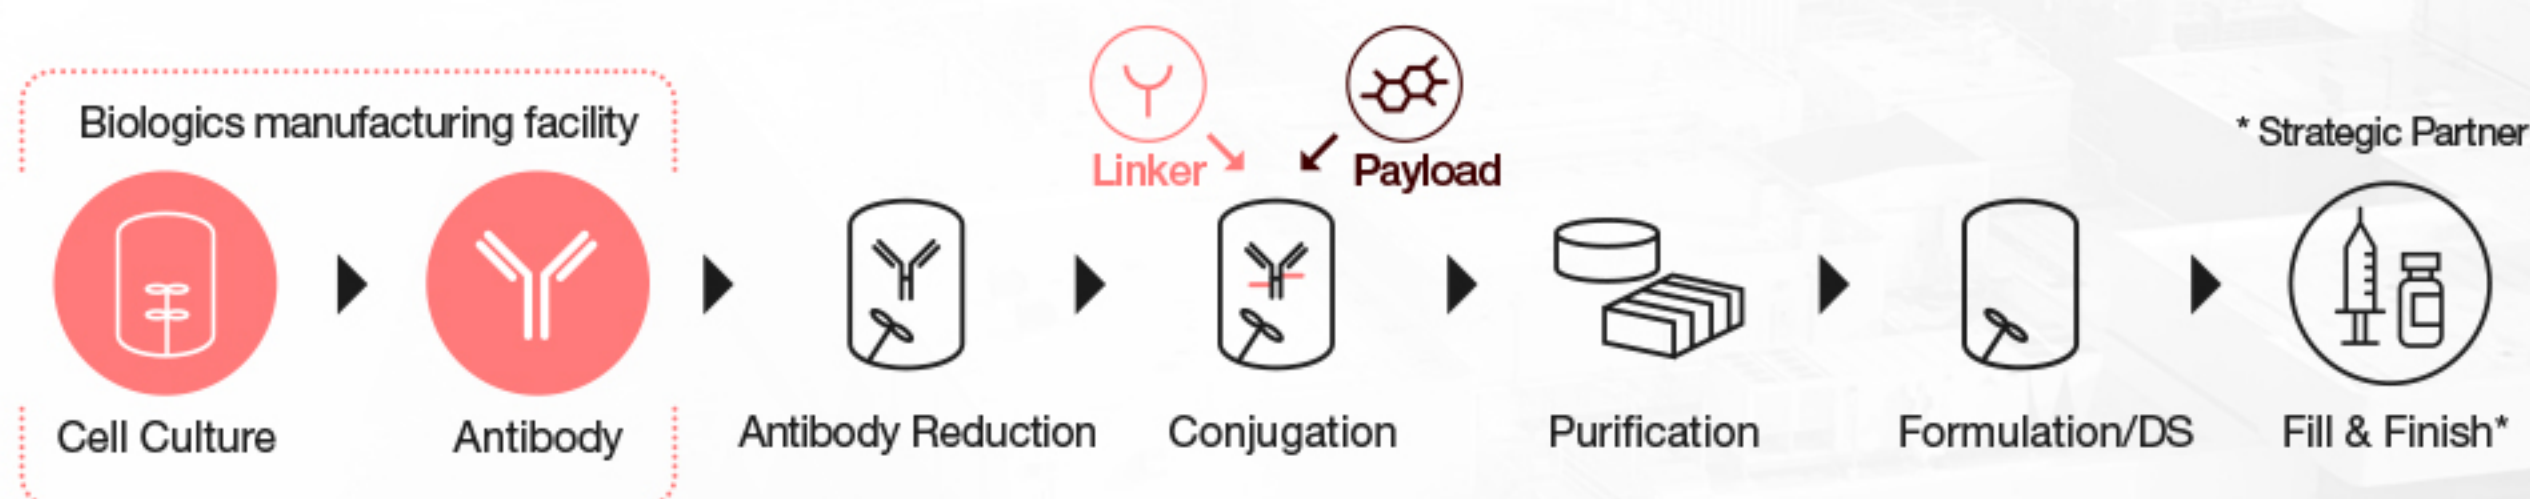

Through agile tech transfers and large-scale cGMP manufacturing, we provide not only capacity but also unwavering resilience and reliability, empowering you to advance breakthrough therapies and make a lasting impact on global health.

Your U.S.-based Antibody Conjugate Partner

Flexible and High-quality Manufacturing with Proven Biologics Expertise

End-to-End Service Provider

 **Up to 1,000L
Bioconjugation**

For clinical & commercial
production

 **High-Potency
API Safety**

Industry standard containment
(OEL target 10ng/m³)

 **Quality & Compliance
Excellence**

In-house QC, extended characterization,
& regulatory expertise for global compliance

SoluFlex Link™

Novel linker-payload technology for **improved hydrophilicity**, offering:

- Improved Solubility
- Increased PK / PD
- Enhanced in-vivo efficacy

Increased Therapeutic Index
